Stellingen

Behorende bij het proefschrift van Jetsuda Areephong

1. The full characterization of a new compound should be required to put in the experimental information, especially when it was published in high impact factor journal.
S. Huber, G. Calzaferri, *Angew. Chem. Int. Ed.* **2004**, 43, 6738-6742.
2. Bursal Ph.D. students and AIOs are another example of discrimination.
3. Raman Spectroscopy and GC-MS are just different analytical techniques. They are not AVP (Alien vs Predator).
4. There are two major synthesis routes for constructing molecules that are greater than nano-dimensions to make new functional materials. One is the polymerisation, and the other is a bottom-up synthesis procedure beginning with small building blocks. Although these two approaches have both merits and drawbacks, the notable advantage of bottom-up synthesis is that complex molecules can be constructed precisely and not with a molecular weight distribution.
Synthesis of chiral Dotriacontanaphthalenes: How many Naphthalene Units are we able to Elaborately Connect? D. Sue, K. Takaishi, T. Harada, R. Kuroda, T. Kawabata, K. Tsubaki, *J. Org. Chem.* **2009**, 74, 3940-3943.
5. Do not believe something because "This is what our teacher told us". From *The Kalama Sutta*.
(อย่าได้เชื่อโดยเหตุสักว่า ผู้สอนเป็นครูเป็นอาจารย์ของเรา กาลามสูตร ๑๐)
6. Do not believe something merely because it has become a traditional practice. From *The Kalama Sutta*.
(อย่าได้เชื่อโดยเหตุสักว่า สิ่งนี้เป็นสิ่งที่เขาได้ทำตามๆกันมา(ประเพณี) กาลามสูตร ๑๐)
7. The more we work, the smarter we become, but should we work hard or work smart?
8. Thai cuisine is only a little bit spicy.
